

Hub

Remote access to your Airthings Ecosystem

DOWNLOADS

The Airthings Hub is the heart of the Airthings Ecosystem. It brings one or more supported devices online, providing on-demand access to your Indoor Air Quality (IAQ) data at anytime, from anywhere! The Hub will connect with up to 50 wireless Airthings devices pushing data regularly to your iOS/Android app and the Airthings Dashboard. The Hub supports Bluetooth and Airthings SmartLink for long-range data extraction. This allows devices to be distributed around a large building or home and maintain a strong connection. We are offering facility managers, professionals and homeowners an advanced solution while maintaining ease of use and setup on your smartphone, tablet or web dashboard.

FULL IAQ COVERAGE

Airthings Hub can connect to one or more supported devices at a distance of up to 100m indoors, allowing you to place them wherever you need them. Simply plug in the power cord and the Ethernet cable, and register it on Airthings.com or in-app. The mounting bracket allows for placing it on a flat surface or fixing it with screws to the wall.

INCREASE PRODUCTIVITY AND HEALTH

Continuous monitoring of your Indoor Air Quality levels is necessary to minimize potential health effects in all populated spaces. The Airthings Hub gives you remote access to up-to-date sensor values, no matter where you are. With visibility into your Radon and IAQ levels, you can take action to improve the air quality, as well as increase productivity, good health and attendance.

PRODUCT FEATURES

- Remote access to other Airthings devices
- Access to Airthings Dashboard
- Long-range wireless connection with Airthings SmartLink
- Live data streaming to the cloud
- Free mobile app for iOS and Android
- Mounting options: Freestanding or mounted
- LED status indicators: Power, cloud and device connection

ADDITIONAL INFORMATION

PACKAGE CONTENT

- Airthings Hub
- Ethernet cable
- Instruction Manual
- Power supply
- Mounting bracket

ADVANCED ANALYTICS DASHBOARD

The Airthings Hub brings your supported devices online allowing for real-time data on your smartphone, tablet or online dashboard. The Airthings Dashboard includes interpretation of your IAQ data with alerts and advanced analytics. In addition, easily view, compare and export data and receive tips to reduce indoor air hazards, optimize ventilation and save on energy costs.

CELLULAR CONNECTION AVAILABLE

With the Airthings Hub Cellular option, you gain online access through an integrated cellular connection allowing for total autonomy and mobility. This Hub can be used with Ethernet cable or cellular, giving you even more flexibility.

SPECIFICATIONS

- Operational Environment: 4°C to 40°C
- Weight: < 260g
- Dimensions: < 125 x 125 x 25 mm
- Power supply: 100–240 V AC / 50–60Hz
- Protocols: Bluetooth 5, Airthings Smartlink
- Frequency band: 868/915 MHz & 2.4GHz
- Max number of connected devices: 50

REQUIREMENTS

- iOS / Android device
- Bluetooth 4.2 or newer
- Ethernet connection
