

Android Engineer

Hi there! We're looking for a Android Engineer to join our team at Airthings.

We are...

A technology company creating radon and indoor air quality detectors for consumers and professionals.

Headquartered in the heart of Oslo, with offices in both Chicago and Quebec and customers in more than 50 different countries. We have 35 employees and counting, including scientists, engineers, developers and visionaries.

Recently named one of the fastest growing companies in Europe by the Financial Times.

You are...

Intellectually curious and innovative

Eager to grow with the company

An excellent communicator and loves collaborating across teams

Interested in health, science and technology

Key Responsibilities

- Build Android Apps
- Maintain the code bases
- Concept development
- Sharing knowledge

Essentials

- 3-4 years experience with Android development, with at least a couple of apps on Google play store
- BSc or MSc
- Solid knowledge of Android SDK and JAVA and Kotlin
- Solid knowledge of Android Studio, Profiling tools and De-Facto libraries
- Good understanding of Mobile development architectures and best practices
- Good knowledge of BLE (Bluetooth Low Energy)
- Good knowledge of GIT

AIRTHINGS

Norway: Wergelandsveien 7, 0167 Oslo, Norway, +47 468 46 155

USA: Airthings.America Inc., 25N River Lane, Suite 406, Geneva, IL 60134, +1 630 631 1092

Nice to have

- Good knowledge of NDK
- Knowledge of iOS development (swift and objc)
- Knowledge of Backend development
- Knowledge of Database model and ORM
- Good knowledge of Realm databases
- Knowledge of Firmware development
- Knowledge of IT Security

Our mission

Airthings' mission is to ensure that people around the world take control of their indoor air quality through simple, affordable and accurate technology solutions, making radon and air quality detectors as common as smoke detectors.

Please send a cover letter and CV to chamira.fernando@airthings.com by July 25th, 2018. Looking forward to hearing from you!
