

Backend developer

Hi there! We're looking for a backend developer to join our team at Airthings.

We are...

A technology company creating radon and indoor air quality detectors for consumers and professionals.

Headquartered in the heart of Oslo, with offices in both Chicago and Quebec and customers in more than 50 different countries. We have 30 employees and counting, including scientists, engineers, developers and visionaries.

Recently named one of the fastest growing companies in Europe by the Financial Times.

The Cloud & Web team is a small, but growing, autonomous team. We try to be as agile as possible and are continuously improving the way we work.

We're just getting started on our cloud services and are looking for someone to help us move forward as demand for more backend services are on their way. We provide functionality for both mobile apps, web clients, smart home integrations and more. So far most of our code is hosted as functions on AWS Lambda written in Kotlin, but we keep experimenting with different technologies. You will be reporting to the group manager for cloud & web, and work closely with our CTO, Marketing, and VP R&D.

You are...

- Intellectually curious and innovative
- Eager to grow with a company
- Interested in health, science and technology

Key responsibilities

- Mature and maintain our backend services
- Develop simple, elegant, tested, and maintainable solutions

The Airthings logo, consisting of a stylized 'A' in a circle and the word 'AIRTHINGS' in a bold, sans-serif font, is centered at the bottom of the page. The background of the footer area is a light gray grid of dots.

AIRTHINGS

Norway: Wergelandsveien 7, 0167 Oslo, Norway, +47 468 46 155

USA: Airthings America Inc., 25N River Lane, Suite 406, Geneva, IL 60134, +1 630 631 1092

Essentials

- Know your way around Java/kotlin or similar language
- Able to keep stuff running in production. You build it, test it, deploy it, and run it
- Good at working in teams and communicating with the rest of us
- The web and its protocols are your friends

Nice to have

- Experience working with Amazon Web Services, configured by terraform
- Frontend web development experience

Benefits

Be a key member of a great international team in Oslo that is becoming a world leader in smart radon and air quality monitors for indoor air.

Central office located in downtown Oslo, facing the royal castle. Competitive compensation package. Stock options, flexible work hours, social events and more.

Our mission

Airthings' mission is to ensure that people around the world take control of their indoor air quality through simple, affordable and accurate technology solutions, making radon and air quality detectors as common as smoke detectors.

Please send a cover letter and CV to alexander.sagen@airthings.com by Friday 18 May 2018. Looking forward to hearing from you!
